MK 200 HANDY

MK 200 HANDY provides great convenience for cafes and restaurants. The machine is designed to be suitable for closing non-combustible paper containers and plastic containers. It can be closed with external carton cover with carton lid and film. Different types of molds can be used for different containers in the shop. It is practical and fast. The machine is closed with the automatic magnetic lock for the required time and it is automatically opened at the end of the time.
