# About Us

Burak Industrial Machinery Industry and Trade Limited Company was founded by Necmi Koç in 1985 in Istanbul with the aim of manufacturing reactors, mixers, stock tanks, heat exchangers, filter machines and equipment used in the chemical, cosmetic, paint and food industries, as well as second-hand purchase/sale. was established.

## MODERNIZATION

In order to meet the current demands and needs of reactors, mixers, machines and equipment in your existing production lines.

## AUTOMATION

In order to meet the current demands and needs of reactors, mixers, machines and equipment in your existing production lines.

## INSTALLATION

Installation of machinery, equipment and installations on your lines to be added to or installed in your existing facility, tests...

## SERVICE

With our expert and experienced staff, we carry out monthly, semi-monthly and annual maintenance and service applications that need to be done in your existing chemical facilities.

# OUR GOALS

**BURAK ENDÜSTRİYEL**  
MAKİNA SANAYİ VE TİCARET LTD. ŞTİ

## STORAGE / STOCK TANKS

# TANKS

### STORAGE/STOCK TANKS

They are produced for liquid, gas and gel storage in accordance with the relevant standards, with and without pressure. It is produced as horizontal, vertical, jacketed and insulated from stainless steel or carbon steel according to the needs. It is produced in the desired capacity, commissioned together with the piping processes and delivered by us.

## PIPE HEAT EXCHANGER

### PIPE HEAT EXCHANGER

It is the equipment that allows the temperature of the fluids to be changed with another liquid or gas fluid. They can be used for heat exchange of products in many different phases.

It is easily used in the heat exchange of fluids such as liquid-liquid, water-oil, water-gas (air, nitrogen, etc.), steam-water, steam-oil, steam-gas, oil-oil, oil-gas. .

## INDUSTRIAL MIXER

### INDUSTRIAL MIXER

It is used to prepare the product mixture. They are industrial containers designed and manufactured to meet user needs. It is possible to carry out the heating, cooling and mixing processes separately or collectively, providing the ideal environment for the reaction. In the chemical, pharmaceutical and food sectors; They are systems that allow mixing processes, can operate under high pressure or vacuum, have heating and cooling systems, and can make the desired mixture when possible with various mixers. It is mainly produced from AISI 316L quality stainless steel, AISI 304 L quality stainless steel, Glass Coating, Hastelroy stainless steel and Doblex steel materials according to the needs.

**REACTOR**

## REACTOR

Reactors are one of the most important and main industries of the chemical industry. Heating, cooling, thawing or compostable containers on the right for an ideal environment to come in. In the chemistry, pharmaceutical and food industry, especially in chemistry; Solutions that can help with systems that allow chemical processes, high vacuum application capacity, heating and cooling systems and decent elevators.

Although it is mainly produced from 316L quality stainless material. According to the products, it is manufactured from AISI 304 L quality stainless steel, Hastelro stainless steel and Doblex steel.
