4UT ProDX

4UT ProD model Ultrasonic Cleaning Machine is microprocessor controlled and has automatic memory. It has internal heaters and is controlled by a digital panel, has a buzzer for sound signal. It is your greatest assistant in cleaning difficult dirt with its strengthened ultrasonic cleaning performance. It is a model that is mostly preferred by the medical industry and is easy to use and carry.

Areas of Use

- Hospital Equipment
- Surgical Instruments
- Veterinarians
- Disinfection Applications
- Laboratories
- Optical Industry
- Pharmaceutical Industry
- Hairdressers and Barbers

Technical Features

Chassis	AISI 304 Stainless Steel	It is made of certified stainless sheet metal in accordance with the health codex.
External Dimensions (MM)	290 x 185 x 304	
Tank Dimensions (MM)	240 x 135 x 150	
Water Tank Capacity (lt) / Liquid capacity (lt)	4/3	Stainless
Ultrasonic frequency (kHz)	40	Electronic circuit is protected against overload
Ultrasonic power (W) rms	120	
Transducer	2	ø38MM
Heater power (W)	3 00	Special production, protected against dry operation
Total maximum power (W)	260	
Timer (min)	0-59	Digital programmable, double digit display
Thermostat (°C)	25-75	Digital programmable, double digit display
Washing Basket (name)	one	Stainless steel
Accessory	Stainless tank cover + Electric cable	Supplied with the product
Water Drain	None	

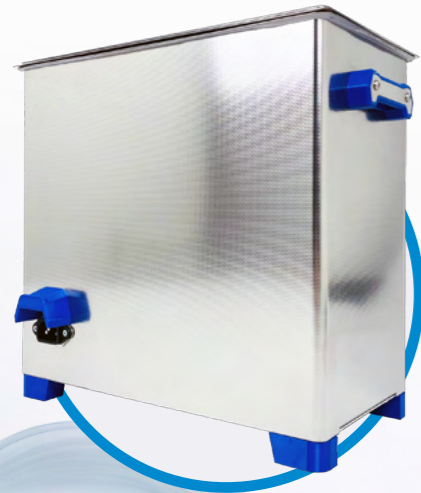

Our company may change the features and design of the machines without notice.

6UT ProDX

The 6UT ProD model is our model with the most optimum dimensions among the small size Ultrasonic Cleaning series . It is microprocessor controlled, has memory and audible warning features, and additionally has a fan cooling system. It is specially produced for repair shops, dental clinics and jewelers.

Areas of Use

- Hospital Equipment
- Surgical Instruments
- Veterinarians
- Disinfection Applications
- Laboratories
- Optical Industry
- Pharmaceutical Industry
- Hairdressers and Barbers

Technical Features

Chassis	AISI 304 Stainless Steel	It is made of certified stainless sheet metal in accordance with the health codex.
External Dimensions (w x h MM)	350x200x315	
Tank Dimensions (exbxh MM)	300x150x150	
Water Tank Capacity (lt) / Liquid capacity (lt)	4/3	Stainless
Ultrasonic frequency (kHz)	40	Electronic circuit is protected against overload
Ultrasonic power (W) rms	180	
Heater power (W)	300	Special production, protected against dry operation
Total maximum power (W) rms	480	
Timer (min)	0-59	Digital programmable, double digit display
Thermostat (°C)	25-75	Digital programmable, double digit display
Washing Basket (name)	one	Stainless steel
Accessory	Stainless tank cover + Electric cable	Supplied with the product
Water Drain	None	

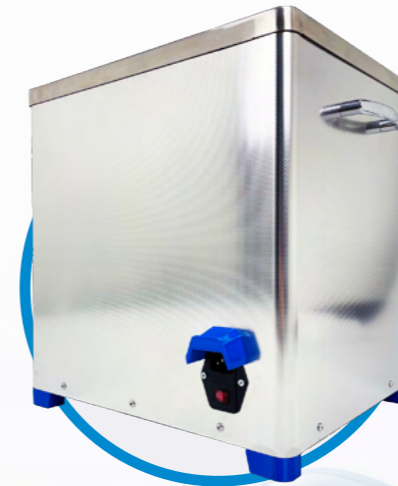

Our company may change the features and design of the machines without notice.

12UT ProDX

12UT ProD model 12 liter Ultrasonic Cleaning Machine has microprocessor control, automatic memory and audible warning. It is equipped with a built-in heater, there is no need to send the heater to the production center for repair, thus our customers are saved from serious costs during the usage period, also the heating performance is increased and energy savings are achieved. It is your greatest assistant in cleaning difficult dirt with its strengthened ultrasonic cleaning performance. Being a desktop model, 12UT ProD is a machine that is easy to use and carry. In this model, measures have been taken to reduce carbon emissions !

Areas of Use

- Hospital Equipment
- Surgical Instruments
- Veterinarians
- Disinfection Applications
- Laboratories
- Optical Industry
- Pharmaceutical Industry
- Hairdressers and Barbers

Technical Features

Chassis	AISI 304 Stainless Steel	It is made of certified stainless steel sheet in accordance with the health codex.
External Dimensions (exbxh MM)	401 x 325 x 410	
Tank Dimensions (exbxh MM)	300x237x200	
Water Tank Capacity (lt) / Water capacity (lt)	14/12	Stainless steel
Ultrasonic frequency (kHz)	40	Electronic circuit is protected against overload
Ultrasonic power (W) rms	240	
transducer	4 pcs	ø38MM
Heater power (W)	500	Special production, protected against dry operation
Total maximum power (W)	~740	
Timer (min)	0-59	Digital programmable, double digit display.
Thermostat (°C)	25-75	Digital programmable, double digit display.
Washing basket (pc)	one	Stainless steel
Accessory	Stainless tank cover + Electric cable	Supplied with the product
Water drain	Stainless, brass plated faucet for tank	It drains all the liquid in the tank with zero surface overhang.

Our company may change the features and design of the machines without notice.

18UT ProDX

18UT ProD model, 18 liter capacity Ultrasonic Cleaning Machine, has microprocessor control, automatic memory and audible warning system. Equipped with a built-in heater, this device does not need to be sent to the production center for heater repair, thus saving our customers significant costs over the lifetime. Additionally, heating performance is increased and energy savings are achieved. Thanks to its reinforced ultrasonic cleaning capacity, it will be your greatest assistant in cleaning the most difficult dirt. 18UT ProD, a desktop model, is produced to meet relatively large volume needs. In this model, measures have also been taken to reduce carbon emissions.

Areas of Use

- Hospital Equipment
- Surgical Instruments
- Veterinarians
- Disinfection Applications
- Laboratories
- Optical Industry
- Pharmaceutical Industry
- Hairdressers and Barbers

Technical Features

Chassis	AISI 304 Stainless Steel	It is made of certified stainless steel sheet in accordance with the health codex.
External Dimensions (exbxdd MM)	440 x 385 x 405	
Tank Dimensions (exbxdd MM)	330 x 297 x 200	
Water Tank Capacity (lt) / Water capacity (lt)	19.6 / 18	Stainless steel
Ultrasonic frequency (kHz)	40	Electronic circuit is protected against overload
Ultrasonic power (W) rms	240	
transducer	4	ø38MM
Heater power (W)	500	Special production, protected against dry operation
Total maximum power (W)	740	
Timer (min)	0-59	Digital programmable, double digit display.
Thermostat (°C)	25-75	Digital programmable, double digit display.
Washing basket (pcs.)	one	Stainless steel
Accessory	Stainless tank cover + Electric cable	Supplied with the product
water drain	Stainless, brass plated faucet for tank	Drains all liquid in the tank with zero surface overhang

Our company may change the features and design of the machines without notice.

28UT ProDX

28UT_ProDX model, 28 liter capacity Ultrasonic Cleaning Machine, has microprocessor control, automatic memory and audible warning system. Equipped with a built-in heater, this device does not need to be sent to the production center for heater repair, thus saving our customers significant costs over the lifetime. Additionally, heating performance is increased and energy savings are achieved. Reinforced ultrasonic cleaning capacity, it will be your greatest assistant in cleaning the most difficult dirt. 28UT_ProDX, a desktop model, is produced to meet large volume needs. Since the minimalist technique was preferred in the design, it takes up little space despite its large liquid tank. In this model, it has also been taken to reduce carbon emissions.

Areas of Use

- Hospital Equipment
- Surgical Instruments
- Veterinarians
- Disinfection Applications
- Laboratories
- Optical Industry
- Pharmaceutical Industry
- Hairdressers and Barbers

Technical Features

Chassis	AISI 304 Stainless Steel	It is made of certified stainless steel sheet in accordance with the health codex.
External Dimensions (exbxdd MM)	611 x 385 x 410	
Tank Dimensions (exbxdd MM)	505 x 297 x 200	
Water Tank Capacity (lt) / Water capacity (lt)	30/28	Stainless steel
Ultrasonic frequency (kHz)	40	Electronic circuit is protected against overload
Ultrasonic power (W) rms	360	
transducer	6 Pieces	ø38MM
Heater power (W)	one thousand	Special production, protected against dry operation
Total maximum power (W)	~1360	
Timer (min)	1-59	Digital programmable, double digit display
Thermostat (°C)	25-75	Digital programmable, double digit display.
Washing basket (pc)	one	Stainless steel
Accessory	Stainless tank cover + Electric cable	Supplied with the product
Water drain	There is	There is

Our company may change the features and design of the machines without notice.

35UT ProDX

35UT_ProD is the model with the largest volume in the desktop cleaning series. It is 35 liters. It is specially produced to fit 54cm washing baskets. In this way, the washing basket can be transferred to all devices of the Central Sterilization Unit (CSU) without the need for an additional basket. Ultrasonic Cleaning Machine is microprocessor controlled and has automatic memory. It has an internal stainless heater and thus heats the liquid quickly and also saves energy. It is controlled by a digital panel. It is your greatest assistant in cleaning difficult dirt with its strengthened ultrasonic cleaning performance.

Areas of Use

- Hospital Equipment
- Surgical Instruments
- Veterinarians
- Disinfection Applications
- Laboratories
- Optical Industry
- Pharmaceutical Industry

Technical Features

Chassis	AISI 304 Stainless Steel	It is made of certified stainless sheet metal in accordance with the health codex.
External Dimensions (exbx d MM)	715 x 420 x 470	
Tank Dimensions (exbx d MM)	600x300x200	
Water Tank Capacity (lt) / Water capacity (lt)	35 / 30	Stainless steel
Ultrasonic frequency (kHz)	40	Electronic circuit is protected against overload
Ultrasonic power (W) rms	480	
transducer	8pcs	ø38MM
Heater power (W)		Special production, stainless
Total maximum power (W)	one thousand	
Timer (min)	~1500	Digital programmable, double digit display
Thermostat (°C)	0-59	Digital programmable, double digit display
Washing basket (pcs.)	25-75	Stainless steel
Accessory	one	Supplied with the product
water drain	Stainless tank cover + Electric cable	Drains all liquid in the tank with zero surface overhang

Our company may change the features and design of the machines without notice.

60UT ProDX

60UT ProD is a mobile ultrasonic cleaning device. It can fit 3 pieces of 54cm washing baskets. It can be moved easily by wheeled structure. It heats the liquid from inside with 2 internal heater and saves energy. Equipped with a liquid level sensor prevents dry running. It is controlled by a digital panel. It is your greatest assistant in cleaning difficult dirt with its strengthened ultrasonic cleaning performance.

Areas of Use

- Hospital Equipment
- Surgical Instruments
- Veterinarians
- Disinfection Applications
- Laboratories
- Optical Industry
- Pharmaceutical Industry
- Defense Industry
- Coating Sector

Technical Features

Chassis	AISI 304 Stainless Steel	Systems complying with the health codex are made of stainless steel.
External Dimensions (exbx d MM)	710x410x890	
Tank Dimensions (exbx d MM)	600x300x350	
Water Tank Capacity (lt) / Water capacity (lt)	60/55	Stainless steel
Ultrasonic frequency (kHz)	28/40	Electronic circuit is built against overload
Ultrasonic power (W) rms	750W	
transducer	12 pieces	ø38MM
Heater power (W)	3000	Custom production is thirstily welcomed
Total maximum power (W)	~3750	
Timer (min)	0-59	Digital programmable, double digit display
Thermostat (°C)	25-75	Digital programmable, double digit display
Washing basket (pc)	one	Stainless steel
Accessory	Stainless tank cover + Electric cable	Supplied with the product
Water drain	Stainless, brass plated faucet for tank	It drains all the liquid inside the tank with zero surface parts

Our company may change the features and design of the machines without notice.

100UT ProDX

100UT ProD is a mobile ultrasonic cleaning device. With large service area it can clean high amounts of material at once. It heats the liquid from inside with 2 internal heaters and saves energy. Equipped with a liquid level sensor prevents dry running. It is controlled by a digital panel. It is your greatest assistant in cleaning difficult dirt with its strengthened ultrasonic cleaning performance.

Areas of Use

- Hospital Equipment
- Surgical Instruments
- Veterinarians
- Disinfection Applications
- Laboratories
- Optical Industry
- Pharmaceutical Industry
- Defense Industry
- Coating Sector
