DRY ICE
Cleaning Machine

Micro Jet

Micro Jet

Micro Jet 3000B is used in industrial cleaning with dry ice spraying method. Micro Jet 3000B, which breaks the block dry ice into snow, shows high performance on sensitive cleaning surfaces. It has become a new generation solution in sensitive cleaning.

Designed in accordance with European Standards (CE), this cleaning machine extends the service life of your machine by cleaning it without the need to stop your production. You will save time and cost with dry cleaning.

Precision Cleaning

3000B stands out with its compact design and is used for delicate cleaning with its snowing feature. This non-corrosive, non-scratching method is non-conductive and does not require secondary cleaning. The FDA-approved dry ice spraying method does not harbor microbes on the applied surface and does not harm the nature as it does not contain chemicals.

Micro Jet, whose body is made of stainless steel, is the leading product of its class with a compact design. The 3000B, which turns block dry ice into snow by breaking it up, shows high performance on sensitive cleaning surfaces. We have a wide range of nozzle options for hard-to-reach surfaces.

- Suitable for Food and Health Industry
- Stainless Steel Body
- Compact Design
- Ergonomic Design
- Precision Cleaning with Block Dry Ice
- Special Pistol Hose
- Special Pistol with/without Light
- Working Capacity up to 10 bar
- Control Panel
- Emergency Stop Button
- Special Hose Sleeve
- 6+2 Kinds of Nozzle Set
