AUTOMATIC AND SEMI-AUTOMATIC WEIGHT FILLING MACHINES

Loadcell filling machines are designed for operation based on the weight of liquid required in each container. They are available as fully automatic or semi-automatic versions, with easy and reliable operation.

DL Series loadcell filling machines have a wide range of filling capacities, bottle types and liquids. They can be operated efficiently and economically without need for highly skilled operators thanks to their ergonomic design; operation and maintenance are very easy.

Technical Features

- 2-6 nozzles
- 5 kg – 30 kg filling capacity
- High accuracy
- Varying filling speed
- Safety sensors for misaligned containers
- Product recipes storage (99)
- Stainless steel or PVC construction
- Pump or gravitational feed
