Block Dry Ice

Production Machine

REFORM MULTI BLOCK

300 RMB (Reform Multi Block),

It stands out with its reforming feature that produces block dry ice. It is designed in accordance with European Standards (CE) and stands out with its power and performance. It produces up to 200 kilograms of block dry ice per hour. With the reforming feature, the pellet dry ice that goes to the dosing unit with the help of the conveyor is compressed and transformed into 300 kg of high quality block dry ice per hour. With Reform technology, it realizes faster production, more robust and ideal dry ice production for packaging.
