SEMI-AUTOMATIC LIQUID FILLING MACHINES

Arsanmak has a wide range of semi-automatic filling machines, which are designed for smaller scale production. They are available in various configurations and capacities, with volumetric operation that requires no pumping of the product, so no need for electricity.

Arsanmak semi-automatic fillers provide reliable operation and accuracy for a wide range of liquids and viscosities. Most models are mobile on wheels; counter-top and mini series are very easy to relocate.

Technical Features

- 1 or 2 nozzles
- Volumetric filling
- Stainless steel construction
- 0,005 L / 1L accuracy
- Easy operation
