## Sort Parameter

Model	ZL-5	ZL-6	ZL-7
Number of Channels	320	384	440
Capacity (T/h)	2-6	4-10	6-15
Voltage (V)	AC220V/50Hz	AC220V/50Hz	AC220V/50Hz
Host power (Kw)	<2.7	<2.7	<3.0
Weight (Kg)	1000 (+5%)	1250 (+5%)	1600 (+5%)
Machine Size (L*W*H/mm)	2314*1485*1700	2650*1485*1700	3010*1485*1700
Ejector Valve	320	384	448
Camerapixel	4096	4096	4096
Air Consumption (m <sup>3</sup> /min)	4,5	5,1	6

# 6 core strengths

## CCD Lens JAPAN

## Advanced image acquisition system

- ◆ Scientific optical system design, multiple light sources, wide viewing angle of the optical design of a variety of materials identification can achieve the best results;
- ◆ High sensitivity, high-resolution Industrial color 40% pixel CCD sensor, instant capture small flaws, the identification of up to 0.04mm<sup>2</sup>;
- ◆ Import wide angel, large aperture lens industrial application, to ensure minimal image distortion, the best image quality.

## Enjektör JAPAN

## The EJECTOR JAPAN

- ◆ All-metal high-frequency electromagnetic valve, has the characteristics of high life;
- ◆ Work more than 1000 times per second;
- ◆ machine air consumption reduced by more than 20%;

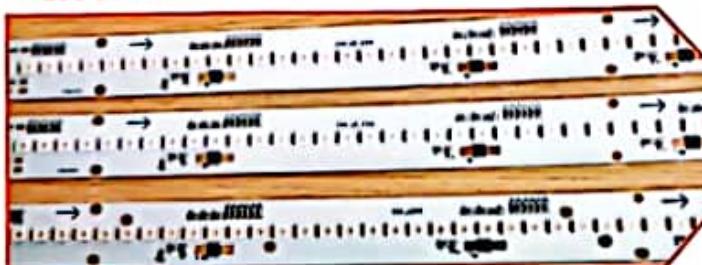

## Dokunmatik Ekran JAPAN

## The HMI&System

- ◆ High-resolution machine interface operating system
- ◆ Users can set their own color selection mode, and can store up to 20 processing varieties for quick switching between different materials selected color;
- ◆ Automatic tracking and automatic correction system, user-friendly.

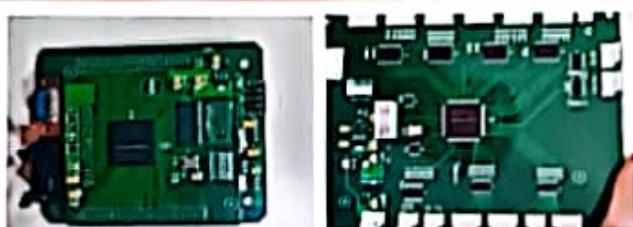

## Led Lamba KORE

## The Lighting System

- ◆ Use LED light source
- ◆ Application of, high-brightness, long life, high consistency of LED light source, fluorescent light to solve the stability of poor, short life of the shortcomings;
- ◆ Different materials require different spectrum lighting, tailored according to customer needs light.

## Kamera Kartı ve İşlemci Kartı USA

## The image processing system

- ◆ high-speed signal processor RGB effective feature extraction;
- ◆ Based on large-scale logic chip FPGA parallel pipeline processing technology, the signal characteristics of the selected material analysis and processing, can identify defects and color differences 0.04mm<sup>2</sup>, efficient and flexible
- ◆ Each group can be independently synchronized multi-tasking multi-color mode is selected, you can synchronize meet being selected, unselected, a variety of colors, while sorting
- ◆ For different materials, unique software algorithms, to improve color fake election results.

## Enjektör Sürücü Kartı USA

## The FPGA computing and processing power

- ◆ A powerful computing and processing
- ◆ Super computing power fast data operation on a variety of handy processing power and flexible, quickly customize various image processing algorithms.

# MACHİNA SETTINGS

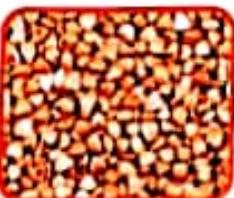

- ◆ Use the machina screen do the materiel picture (one good materiel picture, one bad materiel picture) here we do example for corn
- ◆ Copy the picture to flash
- ◆ Open the software
- ◆ Add the bad picture and good picture to software set this is good. Set this is bad
- ◆ Perform the software, we get the file name "cof"
- Copy the file to flash
- ◆ "Input" the file "Cof" to machine screen, set finish
- ◆ In the screen, you only work sensitive and eject open the delay time.

Corn

Earthnut

Middle Eastern Rice

Mustard Child

Soybean

# CCD belt sorer

- ◆ Unique optical system design, the height of the light source and the camera with them to achieve the best performance
- ◆ High-precision 80% pixel high-speed line scan type CCD, high-definition recognition, high-speed classification
- ◆ Tracked transmission, more stable materials for a variety of irregularly shaped materials.
- ◆ Food grade shatter-proof device, effectively reduce processing losses
- ◆ To give large-scale logic chip FPGA parallel multi-pipeline processing technology, unique software algorithms for signal characteristics of the selected material processing techniques, we can identify defects and color differences 0.08mm<sup>2</sup>, efficient and flexible;
- ◆ High reliability of the system design, and after a long period of high temperature aging test, to ensure reliable operation of each piece of equipment.

## Sort Materials
