

Farm Type Pellet Feed Mill Plants

Pellet Feed Systems for Farm Owners

Starmax designs and manufactures pellet feed facilities for farm owners who want to produce their own pellet feed.

Farm-type pellet feed facilities enable both a reduction in customer costs and a more effective meeting of the nutritional needs of animals.

Prepare Your Ration, Produce Your Own Pellet Feed

The machinery and equipments used in the production facility for cattle, small ruminants, and poultry feed are customized according to the needs and preferences of customer.

Farms that prepare their own pellet feed have advantages such as reduced feed costs, complete control over rations, fresh feed distribution, and decreased dependency on external suppliers.

Pellet feed facilities which include cooling and bagging units, are also ideal for small-scale feed traders and new entrants to the industry.

- ✓ Small-scale pellet feed preparation facilities
- ✓ Farm-type pellet feed systems
- ✓ Pellet feed projects for farms and cooperatives
- ✓ Low-capacity pellet feed production lines
- ✓ Small-capacity pellet feed plants
- ✓ Small-scale pellet mill factories
- ✓ Pellet machine & Hammer mill & Feed mixer
- ✓ Feed crushing and mixing machines & Pellet press & Pellet crumbler (granulator)
- ✓ Farm type feed mill solutions
- ✓ Small feed mill plants
