**SLAUGHTERHOUSE  
TECHNOLOGY**

[www.helmaksmakine.com.tr](http://www.helmaksmakine.com.tr)

# ABOUT US

- HELMAKS SLAUGHTERHOUSE TECHNOLOGY aims to identify hygiene and technological shortcomings of today's slaughterhouses and serves to resolve these shortcomings by his expert staff in Turkey and all over the world.
- HELMAKS realizes turnkey projects to resolve all the needs of small and large scale companies with his expert technological team.
- HELMAKS would like to become partner on growth objectives of small scale companies by the following the technological developments of all over the world for slaughterhouse systems. For this purpose, our company has professional and cost effective solutions for design and construction of slaughterhouses.

# COMPANY PROFILE

**HELMAKS** is based in Ankara/Turkey and manufactures high quality halal slaughter lines and livestock holding pens. We have, therefore, developed cattle and sheep processing lines in full compatibility with the **Halal** regulations.

Our company is always evolving as the needs of our customers change and as new opportunities are created in the market.

To this end, we have entered into a strategic alliance with **V-CONS GROUP NV** of Belgium, which has been serving to this market for over 50 years, to bring our companies closer together in order to leverage our mutual strengths and pool our resources.

We have also teamed up with another Turkish company, which manufactures cold storage rooms, as a solution partner in order to offer you a complete package.

# COMPANY PROFILE

We provide a comprehensive range of equipment and services for slaughterhouses of all sizes, from consultancy and design through to fabrication and installation, each contract receives individual attention and focus on quality is paramount.

If you are looking to implement a project, we can advise you with our vast experience on the most practical and cost effective solutions for your slaughtering operations. We work closely with you to ensure that the solutions we provide are tailored to meet your unique needs, challenges and budgets.

We provide a unique service, tailored to suit your specific needs and can greatly streamline your production process.

We are continuously involved in R & D activities for design and manufacturing of the most modern slaughterhouse facilities throughout the World.

We manufacture EU standards technological equipments with international partners to obtain high-quality meat demand for end users and to ensure animal welfare.

# COMPANY PROFILE

Our range of products bear the **CE marking**, ensuring that we meet the highest standards in safety and construction.

These highly efficient systems reduce manning levels and increase clear floor space.

We offer turnkey projects upon customers demand offering with optimum machinery/equipment, automation, electricity and construction.

We aim to gain maximum customer satisfaction by providing the highest quality and the latest technology with experienced and highly specialized staff about design, manufacturing, after-sales service and technical support.

We offer a range of support services for various requirements throughout the slaughtering process.

After-sales back up for spares, training, etc.

Feasibility studies, budgetary quotations and specification guidance.

Design and consultancy for machines, conveyors or complete slaughterhouse systems.

# COMPANY PROFILE

Process layout design in conjunction with building architects.

Periodic maintenance service on request or by contract.

We would be more than glad to serve you for your slaughterhouse needs and provide the ancillary equipment. Our catalogue is attached for your perusal.
