Dry Ice
Fog Machine

FOGZOOOKA

FogZoOka,

Creates a high quality visual effect. Fog produced with dry ice is denser and does not dissipate immediately. Fog produced with dry ice collapses because it is colder than air and carbon dioxide is denser than air. The fog machine used in art, entertainment and organizations adds visual richness with the ambience it creates. When dry ice is immersed in hot water, it sublimates (changing from solid to gaseous) and produces strongly foaming fumes. The smoke produced is bubbles filled with cold gas. Although dry ice begins to produce fog even when exposed to air at room temperature, the effect and density of the fog it produces is doubled, especially when it comes into contact with hot water.

Dry Ice Fog Machine

FOGZOOOKA

- Nature Friendly
- High Quality Fog Effect
- Stainless Ice Bin
- Compact Design
- High Hopper Capacity
- User Friendly Design
- Color Options
- High Mobility
- Visual Impact on Low Ground
- Indoor and Outdoor Use
- Manual Operation

Technical Information

Size 355 x 428 x 495 mm
Weight 8 kg

Fog Dry Ice
Size 16 mm Pellet

Basket Capacity 5 kg
Tank 20 L

Max Current 8 A
Input Voltage 220 V
