### **BRIEF COMPANY INTRODUCTION**

Since 1989, our company has been producing machines that are used for processing of natural stones such as marble and granite from blocks into slabs, sizing and polishing slabs. Karan Makina, which has succeeded in being the leading company in its sector, produces mostly factory-type big machines that work with the logic of mass production. We have designed completely in our factory, which has a closed area of 5400m<sup>2</sup>, we proud of being a solution partner of many factories with our expert staff, with our machines that we by reflecting the developing technology to machine production.

## **GEZGİN – TRAVELLER COUNTING CUTTING PALLETS MACHINE**

Our crawler machine, also called splitting, is a professional machine developed in line with the intense demands of our customers, offering the fastest and lowest production cost in cutting mountain stone in portable sizes. With a remote control distance of 400 meters, you can direct the machine from any area you want.

Since the machine is electric, the bucket minimizes your fuel cost. Servo control motors are used in walking motors, and inverters are used in cutting motors. Speed adjustment according to the desired stone can be made automatically with the help of a button.

### - Quotation -

DELIVERY

**30 DAYS** AFTER FIRST PAYMENT

PAYMENT

**28.000 €** *Valid for 10 days*

**50% TT to CONFIRM THE ORDER**  
**50% TT BEFORE LOADING**

## Advantages;

- \* Eliminates unnecessary busyness of the work machine
  - \*Minimizes fuel and operator costs
- \* Eliminates time loss in getting attachments over the phone
  - \*Suitable for stove and factory use
- \* Eliminates the need for extra operators during off-hours work
  - \* Provides fast and rapid working opportunity
- \*Thanks to servo motor technology, the machine is suitable for use at optimum values under all conditions.

\*Thanks to the inverter-controlled pulley, it is very easy to set the optimum speed.

\*You can manually adjust the angle of stone cutting. It has powerful laser alignments.
