## GLASS COATER

It is designed for enamel, epoxy, organic and UV paint applications on flat glass and similar surfaces. Glass (roller) Coater, with working widths between 1300 - 2600 mm, paints with a roller system on flat surfaces such as decorative glasses and exterior glasses with high quality.

## UV CURING SYSTEM

It is designed for drying UV-based paints and varnishes applied on glass and similar surfaces. It is used for drying UV coatings on glass, MDF, chipboard and plywood boards, parquet, door panel, cabinet door, PVC paneling and furniture.

## INFRARED DRYER

It is designed for enamel, epoxy or organic paint applications applied on glass and similar panel surfaces. It is a high efficiency drying oven produced in working widths between 1300 - 2600 mm. Since it has district heating feature, it saves energy in case of drying small parts of glass.
